

“Rethinking sustainability issues and values in sports”

11th German-Japanese Symposium of Sport Science 2023

March 1-3, 2023

at the Nippon Sport Science University, Tokyo

The Millennium Development Goals formulated in 2000 are reflected in the UN Sustainable Development Goals (SDGs). The various economic, social and ecological sustainability goals can also be applied to exercise, play and sport. Thus, they play a central role for the global sports movement. However, their implementation in conjunction with the values of sport must be put under scrutiny.

The 11th German-Japanese Symposium will provide an opportunity to rethink and comprehensively discuss the values of sport in terms of sustainability in the face of current challenges such as the COVID-19 pandemic, war and forced migration, from various sport science perspectives and taking into account various developments.
